

CRAFT CORNER:

And bringing the boats down onto the land, forsaking all things, they followed Him.
Luke 5:11

Ice Cube Boat

Make your own little boat, or two, out of an ice cube!

Supplies You Will Need:

~ For one boat

- a plastic cup
- flexible, bendable straw
- tape
- construction paper
- scissors
- hole punch

Instructions to Make:

1. Bend your straw at the flexible spot on the straw and tape the short end to the bottom of the plastic cup.
2. Fill the bottom of the cup with about 2-3 inches of water and let it freeze for a few hours. 
3. After it has frozen, run water on the outside of the cup to loosen the ice so you can remove it from the cup.
4. Using construction paper, cut a square (about 4"x 4" or larger if you prefer) to make the sail. You could also cut a triangle or rectangle instead of a square.
5. In the center of your sail, punch two holes, one close to top and the other near the bottom.
6. Thread your straw through the holes.
7. Place your ice boat in a cold bowl of water. Now, your boat is ready to sail!

Tip: To make your boat last longer, place it back in the freezer for the next time to sail! If it has melted too much, put it back in the cup and re-fill with water.
